3D Printing Design Freedom Through Multi Jet Fusion Technology

Advancements in additive manufacturing technologies have recently created an explosion of new applications across multiple industries. Through HP's Multi Jet Fusion, companies are taking advantage of new design freedoms, quality, complexity, speed and accuracy.

Join the 3D printing experts at Novastar Solutions for an interactive Automation Alley Tech Takeover on how HP Multi Jet Fusion technology enables complex geometries, light-weight parts and frequent utilization within the product lifecycle. Consult with experts regarding potential applications and advantages of 3D-printed parts tailored for your business application.

This event is intended for manufacturers of parts and manufacturing aids, product development teams, researchers and designers.

Date: June 26

Time: 8-10 a.m.

Location: Automation Alley | 2675 Bellingham | Troy, MI 48083
